

Date: April 15, 2024
Subject: TrackKing™ April Release Notes
Location: e-Tech Library

Units: TriPac 3, Precedent, SLXi DRC, SLXi LOCAL, Large Truck and HK450

Description: April release notes for the TrackKing website are listed below.

Release Notes:

- **TrackKing Pro Service Level Upgrade:** When a fleet upgrades their subscription to Tracking Pro, automatically all units will change to match the new billing option from service level, 2-way communication, and logging interval.
Note: Applicable to units on BlueBox and TKV5 telematics hardware.
- **APU Increased Unit Loading Enhancement:** Increased capacity of loaded units to 3,000 on APU tracking list screen.
- **APU Bulk Activation Enhancement:** Ability to activate up to 200 units in one request through a pre-configured form in TrackKing.
- **APU Contract Term and Pay-up Front Bug:** Displays dropdown selection values correctly on the activation screen for dealers and customer support team.
- **APU Stationary Asset History Report Bug:** Navigates to requested stationary asset history report with no errors or exceptions.
- **APU FLOTA Triggering Sequence:** Informs user, with a pop-up warning message, that a device software update is already in-process with a previously selected unit.
- **APU Fuel Consumption Report Bug:** Accurately generates requested fuel consumption report without error messages.
- **APU TrackKing List Screen Search Field Bug:** Displays search field on initial page load.
- **New Manage Fleet Bug:** Ability for dealers to create new vehicle groups with no errors or exceptions.

- **Unit Transfer Screen:** Modifications to contract term, pay up front, and service level for qualified units are not available on the transfer screen.
- **Geofence Notifications Contact Selection Bug:** Ability to select one or more contacts from the notification dropdown list on the Geofence screen.
- **On Demand Reports Bug:** TrackKing platform correctly sends long running (up to 12 months) reports consistently.
Note: Available for all units types selected in the report.
- **Batch Command Bug:** Consistently executing 2-way commands and if communication issues arise TrackKing platform will re-send commands.
- **APU Fuel Consumption Report Bug:** Ability to generate fuel report without screen/system crash.
- **Bug Fixes:** Miscellaneous minor bug fixes.

Best regards,

Telematics Support Team
